This past July, the "Tea" dating app was hacked, leaking the government ID's, private DMs, and images of over 73,000 users. With AI-assisted "vibe coding" becoming increasingly popular, cybersecurity breaches are on the rise, putting both companies and their users at risk. From our expert panel, learn how to stay ahead of the curve and secure your applications from the start — hearing some fun, real-life stories of what happens when you don't. Snacks and drinks will be provided.
