

Practice Questions for Exam 1 (Online Privacy and Online Identity)

Question 1-PandI:

What does Marx mean by “identification by certification of possession of knowledge, artifacts, or skills,” and why is this form of identification relevant to Internet-based human interaction?

Question 2-PandI:

What does Nissenbaum mean by the phrase “privacy as contextual integrity,” and why is this notion relevant to Internet-based human interaction?

Question 3-PandI:

Must public-key certificates contain people’s real names? If so, why? If not, what other types of “end entities” may be securely bound to public keys through the use of certificates?

Question 4-PandI:

Recall that Solove proposes a two-level, 16-part taxonomy of privacy. What are the four top-level categories in his taxonomy?
